

Introduction to HTML/CSS

Thursday, September 24

1:00pm Understanding HTML and CSS

Get an introduction to HTML and CSS. You'll learn:

- The role of HTML and CSS in web development;
- how HTML and CSS have developed over time; and
- how to understand and interpret basic HTML tags.

1:30pm Hands-on Exercise: Learning to code

You'll work hands-on with HTML and CSS in an online simulator (no special programs or installation required). You'll learn:

- how to format and style text;
- how to add images, video, or social media posts; and
- common problems with blog or website post formatting and how to solve them.

3:15pm Hands-on Exercise: Building a webpage

Apply your HTML and CSS knowledge to working on your own custom webpage. You'll learn:

- practical applications for HTML and CSS tags;
- how, and when, to use CSS stylesheets and in-line CSS; and
- how to perform simple but valuable – and helpful! – tables;

Breaks will be offered throughout the hands-on portion of the workshop.

The last workshop segment will end at 4:00pm.
